

# The Easiest way to visualize dependencies

Delve into a world of absolute simplicity with Kendis as it allows you to identify, organize and track your dependencies with complete clarity

[Try Kendis for Free](#)

Let's face it. Dependencies exist. Expressing them clearly will truly simplify the process of managing your PI.

## Painless Creation

With a simple drag and drop, create multiple cross team dependencies on your Kendis Program Board.

## Sync in Realtime

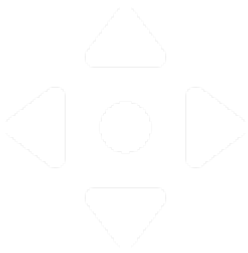

All the dependencies created on the Kendis Board will be synced in real time with your ALM tool.

## Seamless Tracking

Monitor dependencies using our Reports and Analytics Feature.

Features that  
make managing your dependencies effortless

## Drag and drop

With a painless drag and drop, create multiple dependencies amongst various items on your board.

## Sync with Agile Tool

Configure your Agile Tool with Kendis to sync all the dependencies between Kendis and your Agile Tool. All of the dependencies created in Kendis, will be reflected in your Jira Project.

## Set and Track Status with Description

Kendis allows you to describe or add a status to your dependency that greatly impacts to the ease of your Planning.

## Reports and Analytics

Stay up to date with analytics and reports of all the dependencies created, resolved and moved.
