

Maximize the true potential of your PI by integrating [JIRA](#) with Kendis

[Get Started](#)[Book a Demo](#)

Visibility and Transparency

With it's highly flexible and customizable boards, map all of your work items from Jira onto the Kendis Program Board for a much clearer and visible view of your PI Planning.

Quick Setup

Within a matter of seconds, you can have your entire Jira portfolio in Kendis. Connect Jira through our specially designed plugin or by providing your username and key for your Jira API account.

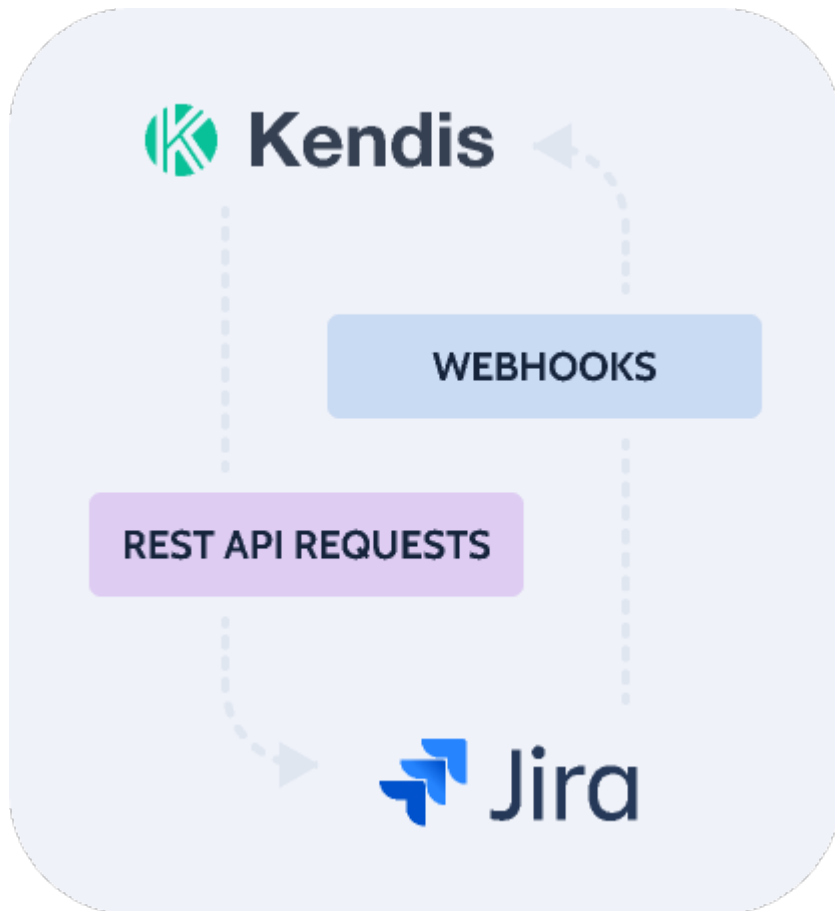

Get Features

Use Jira filters or JQL to obtain all your relevant work items into Kendis. The 2 way sync between Kendis and Jira will ensure that all of your data is efficiently and accurately synced across the two tools.

Updates in Real Time

With the Webhook configured, it will ensure that all the changes that you make to the work items in Jira will be updated in runtime in Kendis.

Your Program Board in Kendis
